

1873

During the Franco-Prussian war Clara Barton went to the battlefront to help the Red Cross workers care for the wounded. She went home in 1873.

She talked to the Pres. of the U.S. and others.

1873

In 1873, Alexander Graham Bell was asked to become a professor at Boston U.

A wealthy business man named Senders agreed to back Alexander's ideas about a telegraph. Fats Hubbard also agreed to help.

Now Bell began a double life. During day he held classes at Boston U. At

night he worked on telegraph. He had his
instruments built in a machine shop where
one of the most highly skilled was a young
man named Thomas Watson. Bell
persuaded Watson to help him work out
his ideas
